Peter Poropat (2009)

Barks and Trunks, Rainforest Trees of South-Eastern Australia **\$ 30.00**

Due to the large number of rainforest tree species, this book will help identify mature rainforest trees by their bark and trunk. The photographs in the book will give the reader a closer appreciation of the different bark types, colourations, textures, trunk shapes and an overall understanding of old-growth rainforest trees.

Peter Poropat (2009)

Barks and Trunks, Rainforest Trees of South-Eastern Australia Volume 2. \$ 40.00

Volume 2 is the second book in the series and contains a further 150 Eastern Australia rainforest tree species. Both books describe brush trees, their barks and trunks and record these trees in their unspoiled environment for their identity, natural heritage and value.

**The Mistletoes of Subtropical Queensland,
New South Wales & Victoria**

\$ 25.00

This book provides the most comprehensive and detailed treatment of the 46 species of mistletoe in eastern Australia.
