

## Acacia complanata (Flat-Stemmed Wattle)

Spreading shrub. Bright yellow ball flowers November to March. Pods straight or twisted, rounded over seeds alternately on each side and slightly to moderately constricted between them. Stems are "winged" giving them a flattened appearance. Long-lived.

**Type:** Tree 2-5m  
**Aspect:** Full Sun  
**Soil:** Well-drained  
**Habitat:** Dry Sclerophyll
