

## Acacia maidenii (Maiden's Wattle)

Tree to 15m on fertile, well-drained soils. Fast growing, forming a broad-canopied tree though fairly short-lived. Unlike many other wattles, it will grow well in some shade, but will tolerate full sun. Creamy flowers in axillary spikes, to 6cm, summer to autumn. Pods leathery, almost terete, twisted or coiled to 15cm x 5mm.

**Type:** Tree to 15m  
**Aspect:** Sun/shade  
**Soil:** Well-drained  
**Habitat:** Rainforest margins

### Special features:

- Attracts –
  - Bees
  - Birds
  - Butterflies
  - Possums
- Drought Tolerant
- Frost Tolerant
