

## Agathis robusta (Queensland Kauri Pine)

Tall, straight, symmetrical, coniferous tree, common in coastal rainforests. Distinctive brown, flaking, scaly bark. Leaves to 13cm x 4cm, are tough and leathery. The seed cones are globose, 8-13 cm diameter, and mature in 18-20 months after pollination. They disintegrate at maturity to release the seed.

**Type:** Tree to 15+m  
**Aspect:** Full Sun/Shade  
**Soil:** Moist  
**Habitat:** Dry Sclerophyll

### Special features:

- Attracts –
  - Birds
- Street Tree
- Frost Tolerant
- Timber Tree
