

Atalaya multiflora (Broad Leaved Whitewood)

A rare and endangered rainforest tree of the soapberry family native to eastern Australia. The habitat is in the drier rainforest areas. The bark is relatively smooth, coloured greyish brown. Tiny, creamy flowers appear in January to December. The paired winged fruit is a fawn-coloured samara, each wing 3 – 3.5 cm long, the round brown seed about 6 mm in diameter

Type: Tree to 15+m
Aspect: Full Sun
Soil: Well-drained
Habitat: Dry Sclerophyll

Atalaya multiflora
