

## Barklya syringifolia (Crown of Gold)

Magnificent tree with light green heart shaped leaves to 10cm long [bronze new growth], sprays of spectacular orange-yellow flowers in summer. Fruit is a brown, flattish pod, ripe April to May. One of the most beautiful flowering trees of our local rainforests. Slow growing but will flower when about 2 metres tall.

**Type:** Tree to 8m  
**Aspect:** Full Sun/Shade  
**Soil:** Adaptable  
**Habitat:** Dry Sclerophyll
