

# Brachychiton discolor (Lacebark Tree)

Deciduous shrub to of drier rainforests. Leaves alternate, hairy, whitish below, to 20cm, 3 or 5 lobed. It has magnificent large, lobed, bell-shaped flowers that are deep pink and velvety, measuring up to 7cm long and the same across. They are produced in terminal clusters from the upper branchlets. When one of these trees is in flower the ground below is carpeted by these beautiful flowers, as they drop soon after opening. Brown-hairy, boat-shaped seed capsules to 20cm.

**Type:** Tree to 15+m  
**Aspect:** Full sun  
**Soil:** Adaptable  
**Habitat:** Dry rainforest
