

# Corymbia citriodora (Lemon-Scented Gum)

Tree known as lemon-scented gum, blue spotted gum and lemon eucalyptus. Cream flowers in winter. Corymbia citriodora has smooth, pale, uniform or slightly mottled bark, white to coppery in summer, and a conspicuously narrow-leaved crown which smells strongly of lemons. Pear-shaped buds are borne in clusters of three, formed in the corner of leaf and stem junctions, whilst fruit (capsules) are urn-shaped.

**Type:** Tree to 15+m  
**Aspect:** Full Sun  
**Soil:** Adaptable  
**Habitat:** Dry Sclerophyll

## Special features:

- Attracts –
  - Bees
  - Birds
- Drought Tolerant
- Frost Tolerant – when mature
- Salt Tolerant
- Essential Oil
- Park Tree
- Timber Tree
