

# Cryptocarya foetida (Stinking Cryptocarya)

Vulnerable tree. Stinking Cryptocarya is a small to medium-sized tree with a dark green crown, and brown, slightly fissured bark. The leaves are oval-shaped with a bluntly pointed tip. The common name is due to the allegedly offensive odour given by the cream flowers in summer.

**Type:** Tree to 10m  
**Aspect:** Full Sun  
**Soil:** Well-drained  
**Habitat:** Dry Sclerophyll
