

## Dinosperma melanophloia (Hard/Aniseed Aspen)

Often associated with Kauri Pine in drier, more seasonal rain forest, often near watercourses. Leaves are leathery, hairless and ovate, paler green below. Often smell like aniseed when crushed. White flowers in summer.

**Type:** Tree 3-10m  
**Aspect:** Part Shade  
**Soil:** Fertile  
**Habitat:** Dry Sclerophyll
