

Eucalyptus bancroftii (Bancroft's Red Gum)

Attractive tree with grey/green foliage and dense spreading crown. Bark peels away in bright orange patches, gradually becoming grey/brown. Large white flowers in spring and summer. Seed capsules are hemispherical or conical, 7-9mm long by 8-9mm wide and have 3-4 valves projecting from the opening, in March to November. Red heart-wood but brittle inferior timber.

Type: Tree to 15+m
Aspect: Full Sun
Soil: Adaptable
Habitat: Wallum

Special features:

- Attracts –
 - Bees
 - Birds
 - Koalas
- Fire Resistant
- Fragrant Foliage
- Light Frost Tolerant
- Shade Tree
