

Eucalyptus propinqua (Grey Gum)

Tall tree. Once a year the bark is shed in huge slabs and displays new colours, ranging from pale cream to light orange. Leaves alternate, to 16cm x 25mm, dark green above, paler below. Flowers January-March, white and sparse, generally high in the canopy. The fruit are small, round and with short teeth.

Type: Tree 15-40m
Aspect: Full sun
Soil: Adaptable
Habitat: Moist and Dry Open Forest

Special features:

- Attracts –
 - Bees
 - Birds
 - Koalas
 - Gliders
- Timber Tree
