

# Flindersia xanthoxyla (Yellowwood)

Tall, straight tree often in drier rainforests. Greyish-brown scaly bark. Leaves opposite, paler and finely hairy below. Yellow 5-petaled flowers to 10mm, in panicles, in summer. Oblong woody seed capsules to 10cm, covered in blunt spines, splitting into 5 boat-shaped segments. Seeds includes thin seed "wings", which surround the heavier central part of the seed. An ornamental tree. Also planted for shade. Previously used for timber in the construction of coaches.

**Type:** Tree to 15+m  
**Aspect:** Full Sun/Part Shade  
**Soil:** Well-drained  
**Habitat:** Dry Sclerophyll
