

## Grevillea banksii (Banks' Grevillea)

Shrub or small tree. Leaves alternate, discolorous, finely divided, to 30cm. Red or cream flowers in spikes to 15cm in spring. Flowers most of the year. Very hardy. A mixed planting of cream and red forms provides interesting contrast.

**Type:** Shrub to 5m  
**Aspect:** Full Sun  
**Soil:** Adaptable  
**Habitat:** Wallum
