

## Melaleuca polandii Dwarf (Gold Tipped Bottlebrush)

This shrub is commonly known as the Gold-tipped Bottlebrush and is a shrub that varies in height. The leaves are ovate to lanceolate in shape and bear numerous oil dots. The brushes are from 6-10cm long and bright red with yellow anthers. Flowering is said to extend from late winter to early summer. *Callistemon polandii* is a “double-barrelled” plant. Not only are the flowers extremely colourful but the new growth is bright red. Both young foliage and flowers are attractive features.

**Type:** Shrub to 1.5m  
**Aspect:** Full Sun  
**Soil:** Adaptable  
**Habitat:** Open Forest to Rainforest Margins

### Special features:

- Attracts –
  - Bees
  - Birds
- Screening Plant
- Clay Tolerant
