

## Micromelum minutum (Lime Berry)

Small tree in drier rainforests. Attractive habit, leaves to 7cm, masses of small white, 5-petalled highly perfumed flowers to 5mm, in autumn to winter. Attractive edible yellow-orange fruit to 10mm, borne in clusters, which attracts birds. Crushed leaves aromatic. Good shade tree. Understorey plant.

**Type:** Shrub to 6m  
**Aspect:** Full Sun/Part Shade  
**Soil:** Adaptable  
**Habitat:** Dry Sclerophyll
