

## Phaleria clerodendron (Scented Daphne)

This rainforest shrub grows to about 6 m tall. Leaves are simple and opposite. It is spectacular when flowering as it bears numerous clusters of tubular flowers along the trunk and branches. The sepals are white to cream and up to 4 cm long. The flowers are followed by fleshy, red, egg-shaped fruits. All parts of this tree are poisonous. Extremely strong and fibrous bark

**Type:** Shrub to 6m  
**Aspect:** Part Shade  
**Soil:** Moist  
**Habitat:** Dry Sclerophyll
