

Polyscias elegans (Celery Wood)

Crushed leaves, stems and bark have a celery smell. Tiny purplish flowers in large, densely branched terminal racemes, summer to autumn. 5mm, dark purplish-black, 2-lobed fruit. A fast growing medium sized tree with an attractive palm like or umbrella shaped crown. This tree has relatively soft wood.

Type: Tree to 15+m
Aspect: Full Sun/Shade
Soil: Adaptable
